

Entrance Doors
Architectural Aspirations

Here at Ação Suave, we are on a mission to bring you design excellence.

CRAFTING YOUR UNIQUE ENTRANCE.

While browsing our extensive collection of luxury entrance doors, you will find plenty of models, ranging from conventional to avant-garde, but they all have one thing in common - welcoming you home.

What's your favourite part of the day, ours is
COMING HOME
Keeping you warm and safe with carefully designed
technology applied as standard with Ação Suave.

WHY ALUMINIUM

for your entrance door?

Aluminum is a very stable material, with minimal expansion and contractions due to changes in ambient temperature. It meets energy standards providing excellent thermal insulation as well as security, sound insulation and weather proofing.

Strong, but lightweight, very durable and low-maintenance, aluminum is resistant to harsh weather conditions and will not change its appearance over time, ensuring an extended product life cycle.

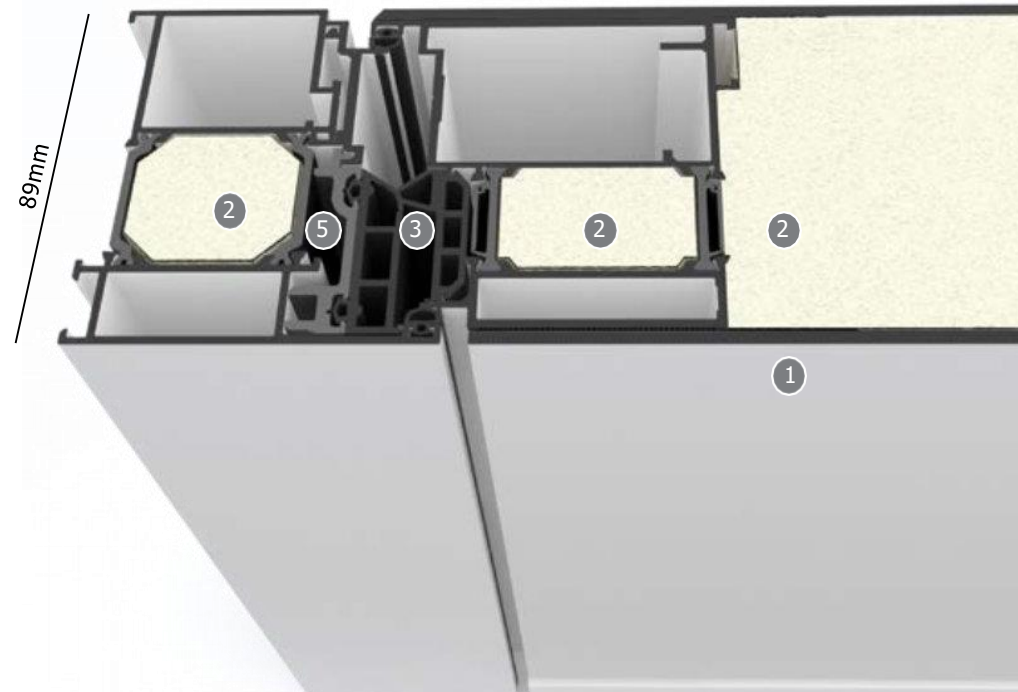

With a range of finishes, and hardware options, no two doors are the same.

CAREFULLY DESIGNED TECHNOLOGY

Our aluminium entrance doors come with a high level of insulation, improved stability and advanced security.

1. 3mm aluminium sheet
2. Aluminium extrusions separated with polyamide thermal breaks reinforced with glass fiber and additional PU insulated chamber
3. 3 level EPDM seals gaskets for optimal weather tightness
4. Low aluminium threshold
5. Polyamide

*for door dimensions 1250mm x 2500mm

IT IS NOT JUST A LOCK, IT IS OUR WAY OF PROTECTING YOUR HOME

As standard all our doors are equipped with a multi-point RC2 security lock.

OPTIMAL SECURITY

Fitted with a five-point lock with main hook, 2 pin bolts and 2 hook bolts in the additional lock cases, our doors offer uncompromised security. Steel pinbolts provide a secure hold in the door frame, while hook bolts make pushing the leaf and the frame apart harder.

The cylinder can be locked from both sides - even if there's already a key in the lock. Besides great security features, the standard FL01 lock has smooth movements, soft-close option and it is maintenance-free.

FL01

FL02
FL03

ADVANCED SECURITY

FL02 is a five-point lock combining security and ease of use. This system provides both mechanical and automatic locking, adding an extra layer of safety for your home. The door is automatically locked as soon as it is closed, so you will never have to wonder whether you left it unlocked again.

FL03 is a half-motorized five-point lock going even further when it comes to comfort and security.

While having all the features of FL02, it also makes the use of the key unnecessary. From the inside, it's unlocked via lever (comes with child lock block) and from the outside it can be combined with any access control system (e.g. finger scanner, key pad or home automation system).

PRECISE HINGES

Our barrel hinges achieve the highest possible load-bearing performance with a maximum load transfer, while remaining visually attractive. The hinges also feature optimized adjustment without having to remove the leaf.

Our doors are equipped with anodized hinges as standard. Powder coated hinges are also available to match the colour of the door or completely concealed.

WITHOUT BIMETALLIC EFFECT

Due to extreme temperature differences, mostly occurring in winter and summer, door leaves can tend to deform, making closing and locking the door difficult.

Our doors come with a unique technology, increased thermal bridge and optimal sealing to prevent bimetallic effect and ensure the stability of the door regardless of climatic conditions.

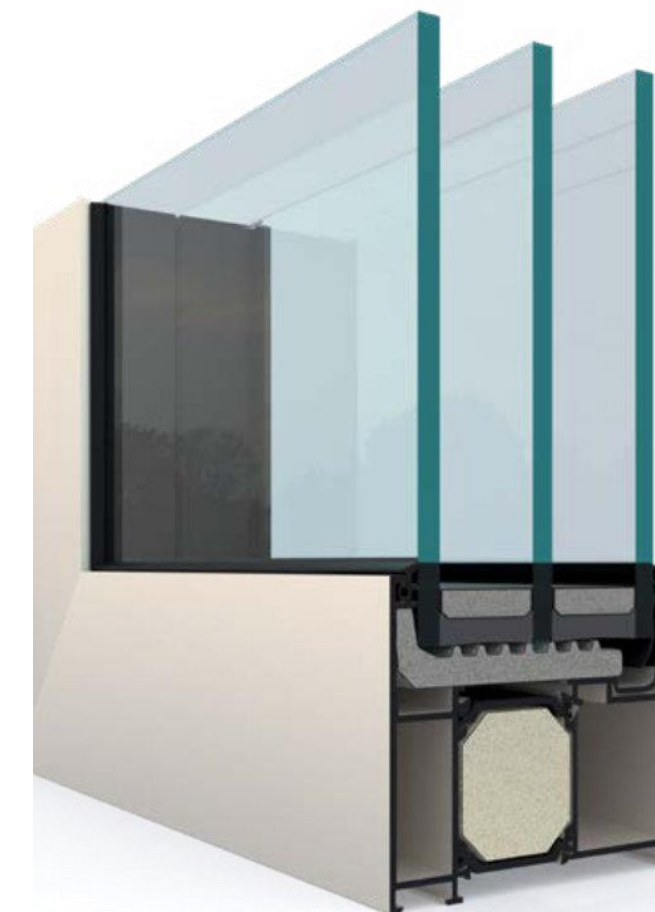

SAFETY GLASS

All doors with glass inserts are fitted with Triple glazed safety glass

4.4.2. +5 float glass + 3.3.2; $U_g = 0.6 \text{ W/m}^2\text{K}$.

This guarantees increased security and resistance to accidents or burglaries and meets the latest energy efficiency standards.

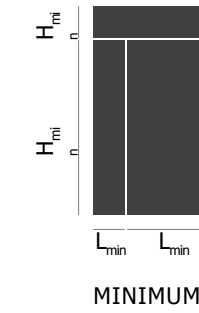

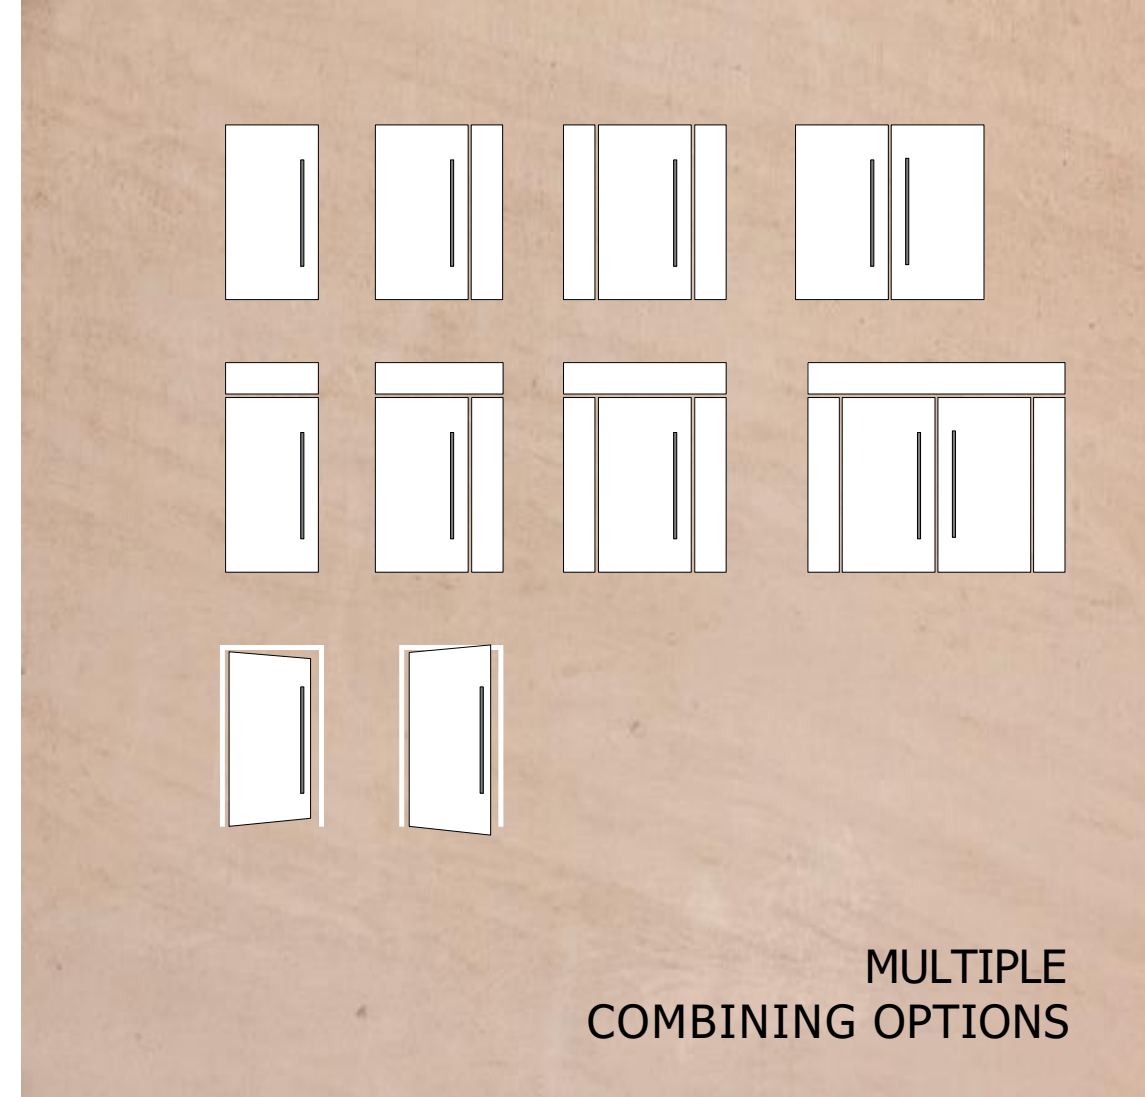

COMPLETE ENTRANCE SOLUTIONS

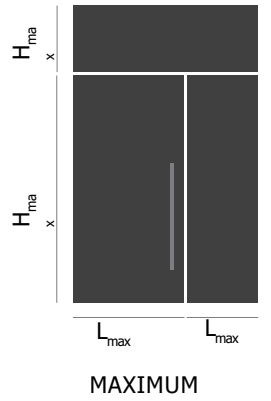

With a maximum height of 3000mm and width of 1300mm, Our doors are monumental masterpieces.

Make them even more impressive by adding a second door, side sections or top light.

Other than the traditional inward opening, we also provided outward opening doors.

Allow us to introduce

DOUBLE DOORS

Developed as a symbiosis of artistic thinking and quality craftsmanship.

WE KNOW IT IS NOT EASY

Your entrance is a statement giving your home a personality which defines you to the outside world.

We understand, other than being impeccably functional, you want it to leave a lasting impression.

This is why every model has been carefully considered based on quality, function, design and cost.

HANDCRAFTED WITH THE FINEST NATURAL MATERIALS,

you are sure to enjoy your entrance
door for many years to come.

Impeccably built and exquisitely designed,

PIVOT DOORS

will create a stunning first impression for your contemporary home.

WHAT MAKES OUR PIVOT SYSTEM UNIQUE?

Maximum safety with certified burglar resistance RC3. Maximum energy efficiency with high thermal insulation coefficient $U_d = 0,7W/m^2K$. High level of insulation with special anti-distortion polyamids for improved thermal performance.

Peri-metrical sealing with a central gasket and 3 levels of EPDM gaskets. Co-planarity between wall, frame and leaf. Easy access with low threshold.

Standard leaf width of 115mm guarantees improved stability.

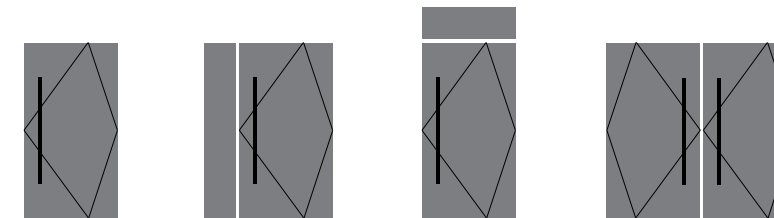

Depth measurements 115mm - 126mm

We perfected the system to make an entrance the focal point of your modern home.

Even at maximum sizes, our pivot doors maintain their smooth and fluid movement, advanced security, stability and insulation.

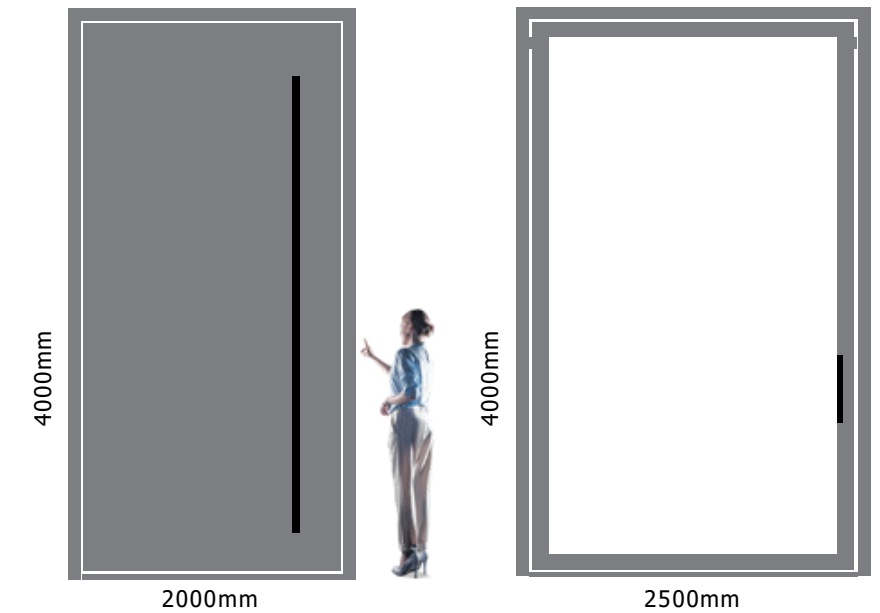

In terms of design, this grand, oversized entrance enables a whole new world of creative options by using innovative materials and bespoke handrails to create the perfect statement.

Bespoke pivot hinges are located at one third of the overall opening, allow rotation with approximately 2/3 of the doors leaf opening inwards.

COMBINING OPTIONS

include single and double door with sidelights and toplight.

DIMENSIONS

of our STANDARD PIVOT DOORS go up to 4000mm in height and 2000mm in width. The XL GLASS MODEL has maximum dimensions of 2500mm in width and 4000mm in height.

EVERY DOOR TELLS A STORY.

It starts as an idea sketched on the back of a napkin, evolved into a technical drawing and comes to life during the production process.

Every detail is the direct result of the creative process and experience of our engineers and artisans.

We are sure your Entrance Door will satisfy your desire for a modern, functional and quality product.

SPOILT FOR CHOICE...

Follow your instincts and choose from our palette of colours, wood, glass shade and stone as a finishing material with selected models. Still not sure? We are on hand to help.
